- ✓ Assertive communication
- ✓ Solidarity
- ✓ Responsibility
- ✓ Self-taught

Languages

Spanish: Native
English: B1 Intermediate

Work experience

Fullstack web developer
01/2021 - Present
Reboot CR - 4thewords.com

Software development company, owner of the web application called 4thewords, where my responsibilities include maintaining the application to resolve technical debt, creating new features from widgets to full screens, fixing bugs in both old and new features, and more. My duties span from frontend to backend, with some involvement in DevOps.

University experience

Fullstack web developer
09/2018 – 12/2018
Cubik - LimOn

Fictitious company created for project 1 course, which designed and developed a web application for hotel and tourist site registration, where clients could make reservations to these places. A requirements session was conducted, which had to be converted into a formal document with all use cases and other details, thus recreating a very realistic work environment.

Education

Bachelor's degree in software engineering
01/2021 - Present
Cenfotec university

Intensive english course
06/2024 - Present
Fundatec - TEC
